

Introduction (spoken)

Whenever life gets you down,
 And things seem hard or tough
 And people are stupid, obnoxious or daft
 And you feel that you've had quite enough

VERSE 1

Just remember that you're standing on a planet that's evolving
 revolving at nine hundred miles an hour
 That's orbiting at nineteen miles a second so it's reckoned,
 A sun that is the source of all our power
 The sun and you and me and all the stars that we can see
 Are moving at a million miles a day
 In an outer spiral arm at forty thousand miles an hour
 Of the galaxy we call the 'Milky Way'

VERSE 2

Our galaxy itself contains a hundred billion stars
 It's a hundred thousand light years side to side
 It bulges in the middle sixteen thousand light years thick
 But out by us it's just three thousand light years wide
 We're thirty thousand light years from galactic central point
 We go 'round every two hundred million years
 And our galaxy is only one of millions of billions
 in this amazing and expanding universe

VERSE 3

The universe itself keeps on expanding and expanding
 In all of the directions it can whizz
 As fast as it can go at the speed of light, you know
 Twelve million miles a minute and that's the fastest speed there is
 So remember when you're feeling very small and insecure
 How amazingly unlikely is your birth
 And pray that there's intelligent life somewhere up in space
 'Cause there's bugger all down here on Earth.
